Subject index*

A

Abstracts

- Papers presented at APIC '85: Twelfth Annual Educational Conference, May 13-17, 1985, 128

Acinetobacter

- An outbreak of nosocomial *Acinetobacter* infections from humidifiers (Gervich and Grout), 210

Antimicrobial susceptibility testing

- Disk diffusion antimicrobial susceptibility testing for clinical and epidemiologic purposes (Graham et al.), 241

APIC Curriculum

- Survey of purchasers of *The APIC Curriculum for Infection Control Practice*: Findings and recommendations (Checko, Soule, and Jackson), 250

B

Bacterial contamination categories

- Postoperative wound infection surveillance by use of bacterial contamination categories (Lennard, Hargiss, and Schoenkecht), 147

Burn patients

- Improperly sterilized fine-mesh gauze associated with donor site infections in skin-grafted burn patients (Kravitz et al.), 178

C

Catheter-associated infections

- Cost-effective application of the Centers for Disease Control Guideline for Prevention of Catheter-associated Urinary Tract Infections (Epstein), 272

*February, pp. 1-50; April, pp. 51-96; June, pp. 97-144; August, pp. 145-192; October, pp. 193-240; December, pp. 241-296.

U

- Underwood M. A. Cost-effective application of the Centers for Disease Control Guideline for Isolation Precautions in Hospital, 269

V

- Van Drunen M. Book review, 50

W

- Wall M. (see Boyce et al.), 228
Wang W.-L. (see Parkhurst et al.), 7
Warden G. D. (see Kravitz et al.), 178
Weitekamp M. R., Chan P., and Aber R. C. An algorithm for the control of nosocomial varicella-zoster virus infection, 193
White J. W. (see Haley et al.), 97
White R. L. (see Boyce et al.), 228
Woods G. L. (see Steward et al.), 154

- Failure of the urinalysis and quantitative urine culture in diagnosing symptomatic urinary tract infections in patients with long-term urinary catheters (Steward et al.), 154

Centers for Disease Control Guidelines

- Cost-effective application of the Centers for Disease Control Guideline for Handwashing and Hospital Environmental Control (Rutala), 218
Cost-effective application of the Centers for Disease Control Guideline for Infection Control in Hospital Personnel (Septimus), 224
Cost-effective application of the Centers for Disease Control Guideline for Isolation Precautions in Hospitals (Underwood), 269
Cost-effective application of the Centers for Disease Control Guideline for Prevention of Catheter-associated Urinary Tract Infections (Epstein), 272
Cost-effective application of the Centers for Disease Control Guideline for Prevention of Intravascular Infections (Frawley), 275
Cost-effective application of the Centers for Disease Control Guideline for Prevention of Nosocomial Pneumonia (Boyce et al.), 228
Cost-effective application of the Centers for Disease Control Guideline for Prevention of Surgical Wound Infections (Terry), 232
Cost-effective application of the Centers for Disease Control Guidelines for Prevention of Nosocomial Infections (Duffy), 216
The CDC Guidelines for Prevention and Control of Nosocomial Infections: View from the trenches (Nottebart), 40 (commentary)

Chlamydia

- Chlamydial infections (Larson and Nachamkin), 259

Continuing education series

- Chlamydial infections (see Larson and Nachamkin), 259

Continuing education series in the *American Journal of Infection Control* (Lynch and Soule), 51 (editorial)

Infections and infection risk in residents in long-term care facilities: A review of the literature, 1970-1984 (Jackson and Fierer), 63

Infectious complications of neoplastic disease (Polsky and Armstrong), 199

Monitoring: Surveillance for nosocomial infections and uses for assessing quality of care (Lynch and Jackson), 161

Cost-effectiveness

Cost-effective application of the Centers for Disease Control Guideline for Handwashing and Hospital Environmental Control (Rutala), 218

Cost-effective application of the Centers for Disease Control Guideline for Infection Control in Hospital Personnel (Septimus), 224

Cost-effective application of the Centers for Disease Control Guideline for Isolation Precautions in Hospitals (Underwood), 269

Cost-effective application of the Centers for Disease Control Guideline for Prevention of Catheter-associated Urinary Tract Infections (Epstein), 272

Cost-effective application of the Centers for Disease Control Guideline for Prevention of Intravascular Infections (Frawley), 275

Cost-effective application of the Centers for Disease Control Guideline for Prevention of Nosocomial Pneumonia (Boyce et al.), 228

Cost-effective application of the Centers for Disease Control Guideline for Prevention of Surgical Wound Infections (Terry), 232

Cost-effective application of the Centers for Disease Control Guidelines for Prevention of Nosocomial Infections (Duffy), 216

The low yield of routine radiographic screening of tuberculin-positive hospital employees (Nemcek, Forrest, and Barrett-Connor), 52

D

Disk diffusion

Disk diffusion antimicrobial susceptibility testing for clinical and epidemiologic purposes (Graham et al.), 241

Drug-resistant organisms

Comparison of methicillin-resistant and methicillin-sensitive *Staphylococcus aureus* bacteremia (Lewis and Saravolatz), 109

An outbreak of methicillin-resistant *Staphylococcus aureus* eradicated from a large teaching hospital (Alvarez et al.), 115

H

Handwashing

Cost-effective application of the Centers for Disease Control Guideline for Handwashing and Hospital Environmental Control (Rutala), 218

Hepatitis B

Prevalence survey for hepatitis B in high-risk university hospital employees (Hicks, Hargiss, and Harris), 1

A survey of hepatitis B vaccination programs for hospital employees (James et al.), 32

Hospital employees

Cost-effective application of the Centers for Disease Control Guideline for Infection Control in Hospital Personnel (Septimus), 224

The low yield of routine radiographic screening of tuberculin-positive hospital employees (Nemcek, Forrest, and Barrett-Connor), 52

Prevalence survey for hepatitis B in high-risk university hospital employees (Hicks, Hargiss, and Harris), 1

Rubella screening and vaccination follow-up by a hospital employee health office (Kohl), 124

A survey of hepatitis B vaccination programs for hospital employees (James et al.), 32

I

Immune defects

Infectious complications of neoplastic disease (Polsky and Armstrong), 199

Infectious waste management

A critical review of "Draft Manual for Infectious Waste Management (Mallison), 45 (commentary)

Influenza

Immunization roulette: Influenza occurrence in five nursing homes (Christie and Marquis), 174

Intensive care units

Effect of an expanded physical facility on nosocomial infections in a neonatal intensive care unit (Larson, Hargiss, and Dyk), 16

Intravascular infection

Cost-effective application of the Centers for Disease Control Guideline for Prevention of Intravascular Infections (Frawley), 275

Isolation

Cost-effective application of the Centers for Disease Control Guideline for Isolation Precautions in Hospitals (Underwood), 269

Isolation practices: A historical perspective (Jackson and Lynch), 21

L

Legal aspects and liability

Moral, ethical, and legal aspects of infection control (Parment), 278 (commentary)

An integrated approach to liability (Siler), 90 (commentary)

Long-term care

Failure of the urinalysis and quantitative urine culture in diagnosing symptomatic urinary tract infections in patients with long-term urinary catheters (Steward et al.), 154

Immunization roulette: Influenza occurrence in five nursing homes (Christie and Marquis), 174

Infections and infection risk in residents in long-term care facilities: A review of the literature, 1970-1984 (Jackson and Fierer), 63

Nosocomial infections among patients in a long-term care facility: Spectrum, prevalence, and risk factors (Setia, Serventi, and Lorenz), 57

M

Monitoring

- Monitoring: Surveillance for nosocomial infections and uses for assessing quality of care (Lynch and Jackson), 161

N

Neonatal care

- Effect of an expanded physical facility on nosocomial infections in a neonatal intensive care unit (Larson, Hargiss, and Dyk), 16

Neoplastic disease

- Infectious complications of neoplastic disease (Polsky and Armstrong), 199

O

Outbreaks

- An outbreak of methicillin-resistant *Staphylococcus aureus* eradicated from a large teaching hospital (Alvarez et al.), 115
- An outbreak of nosocomial *Acinetobacter* infections from humidifiers (Gervich and Grout), 210
- Surveillance for the detection of nosocomial infections and the potential for nosocomial outbreaks. II. Development of a laboratory-based system (Parikhurst et al.), 7

P

Physical facility

- Effect of an expanded physical facility on nosocomial infections in a neonatal intensive care unit (Larson, Hargiss, and Dyk), 16

Pneumonia

- Cost-effective application of the Centers for Disease Control Guideline for Prevention of Nosocomial Pneumonia (Boyce et al.), 228

Prevalence

- Nosocomial infections among patients in a long-term care facility: Spectrum, prevalence, and risk factors (Setia, Serventi, and Lorenz), 57
- Prevalence survey for hepatitis B in high-risk university hospital employees (Hicks, Hargiss, and Harris), 1

Professional ethics

- Moral, ethical, and legal aspects of infection control (Parent), 278 (commentary)
- Professional ethics for infection control: The changing role of the infection control practitioner (Chavigny), 183 (commentary)

Prospective payment

- Update from the SENIC Project. Hospital infection control: Recent progress and opportunities under prospective payment (Haley et al.), 97

Q

Quality of care

- Immunization roulette: Influenza occurrence in five nursing homes (Christie and Marquis), 174
- Monitoring: Surveillance for nosocomial infections and uses for assessing quality of care (Lynch and Jackson), 161

R

Radiography

- The low yield of routine radiographic screening of tuberculin-positive hospital employees (Nemcek, Forrest, and Barrett-Connor), 52

Reservoirs of infection

- Experience with pyrogen contamination of large-volume parenteral solutions (Stansfield), 240 (letter)
- Improperly sterilized fine-mesh gauze associated with donor site infections in skin-grafted burn patients (Kravitz et al.), 178
- An outbreak of nosocomial *Acinetobacter* infections from humidifiers (Gervich and Grout), 210
- Reply to Stansfield letter (Talbot and Miller), 240 (letter)
- Sterile water and saline solution: Potential reservoirs of nosocomial infection (Brown et al.), 32

Review process

- The review process and editorial responsibilities (Castle and Klimek), 145 (editorial)

Risk factors

- Immunization roulette: Influenza occurrence in five nursing homes (Christie and Marquis), 174
- Infections and infection risk in residents in long-term care facilities: A review of the literature, 1970-1984 (Jackson and Fierer), 63
- Infectious complications of neoplastic disease (Polsky and Armstrong), 199
- Nosocomial infections among patients in a long-term care facility: Spectrum, prevalence, and risk factors (Setia, Serventi, and Lorenz), 57
- Prevalence survey for hepatitis B in high-risk university hospital employees (Hicks, Hargiss, and Harris), 1

Role of the infection control practitioner

- Infection control practitioners: Who are we? (Gugliotti), 236 (commentary)
- Professional ethics for infection control: The changing role of the infection control practitioner (Chavigny), 183 (commentary)

Rubella

- Rubella screening and vaccination follow-up by a hospital employee health office (Kohl), 124

S

Salmonella typhi

- Salmonella typhi* carrier state 52 years after illness with typhoid fever: A case study (Shpargel, Berardi, and Lenz), 122

Screening

- The low yield of routine radiographic screening of tuberculin-positive hospital employees (Nemcek, Forrest, and Barrett-Connor), 52
- Rubella screening and vaccination follow-up by a hospital employee health office (Kohl), 124

Staphylococcus aureus

- Comparison of methicillin-resistant and methicillin-sensitive *Staphylococcus aureus* bacteremia (Lewis and Saravolatz), 109
- An outbreak of methicillin-resistant *Staphylococcus aureus* eradicated from a large teaching hospital (Alvarez et al.), 115

Surveillance

- Monitoring: Surveillance for nosocomial infections and uses for assessing quality of care (Lynch and Jackson), 161
- Postoperative wound infection surveillance by use of bacterial contamination categories (Lennard, Hargiss, and Schoenknecht), 147
- Surveillance for the detection of nosocomial infections and the potential for nosocomial outbreaks. II. Development of a laboratory-based system (Parkhurst et al.), 7
- Surveillance by objective: A new priority-directed approach to the control of nosocomial infections. The National Foundation for Infectious Diseases Lecture (Haley), 78

Surveys

- Infections and infection risk in residents in long-term care facilities: A review of the literature, 1970-1984 (Jackson and Fierer), 63
- Isolation practices: A historical perspective (Jackson and Lynch), 21
- Prevalence survey for hepatitis B in high-risk university hospital employees (Hicks, Hargiss, and Harris), 1
- A survey of hepatitis B vaccination programs for hospital employees (James et al.), 32
- Survey of purchasers of *The APIC Curriculum for Infection Control Practice*: Findings and recommendations (Checko, Soule, and Jackson), 250
- Update from the SENIC Project. Hospital infection control: Recent progress and opportunities under prospective payment (Haley et al.), 97

Systems

- An algorithm for the control of nosocomial varicella-zoster virus infection (Weitekamp, Chan, and Aber), 193
- Failure of the urinalysis and quantitative urine culture in diagnosing symptomatic urinary tract infections in patients with long-term urinary catheters (Steward et al.), 154
- Improperly sterilized fine-mesh gauze associated with donor site infections in skin-grafted burn patients (Kravitz et al.), 178
- Monitoring: Surveillance for nosocomial infections and uses for assessing quality of care (Lynch and Jackson), 161
- Postoperative wound infection surveillance by use of bacterial contamination categories (Lennard, Hargiss, and Schoenknecht), 147
- Surveillance by objective: A new priority-directed approach to the control of nosocomial infections. The National Foundation for Infectious Diseases Lecture (Haley), 78

- Surveillance for the detection of nosocomial infections and the potential for nosocomial outbreaks. II. Development of a laboratory-based system (Parkhurst et al.), 7
- Disk diffusion antimicrobial susceptibility testing for clinical and epidemiologic purposes (Graham et al.), 241

T**Tuberculosis**

- The low yield of routine radiographic screening of tuberculin-positive hospital employees (Nemcek, Forrest, and Barrett-Connor), 52

U**Update**

- Update from the SENIC Project. Hospital infection control: Recent progress and opportunities under prospective payment (Haley et al.), 97

Urinary tract infection

- Cost-effective application of the Centers for Disease Control Guideline for Prevention of Catheter-associated Urinary Tract Infections (Epstein), 272
- Failure of the urinalysis and quantitative urine culture in diagnosing symptomatic urinary tract infections in patients with long-term urinary catheters (Steward et al.), 154

V**Vaccination**

- Immunization roulette: Influenza occurrence in five nursing homes (Christie and Marquis), 174
- Rubella screening and vaccination follow-up by a hospital employee health office (Kohl), 124
- A survey of hepatitis B vaccination programs for hospital employees (James et al.), 32

Varicella-zoster virus

- An algorithm for the control of nosocomial varicella-zoster infection (Weitekamp, Schan, and Aber), 193

W**Wound infections**

- Cost-effective application of the Centers for Disease Control Guideline for Prevention of Surgical Wound Infections (Terry), 232
- Improperly sterilized fine-mesh gauze associated with donor site infections in skin-grafted burn patients (Kravitz et al.), 178
- Postoperative wound infection surveillance by use of bacterial contamination categories (Lennard, Hargiss, and Schoenknecht), 147
